▶ ABOUT US

PT Perkasa Beton Batam is a readymix concrete company that serves construction need as a major supplier of construction markets in Batam. Currently we have 3 Batching Plant, located in Kabil & Tembesi. We have established since 2014. Our company operates over strategic concrete plants to produce more than 100.000 meter cubic of concrete annually.

■ VISION

To be the best and most advanced company in the supply of quality and innovative concrete products, and to be able to contribute consistently in the best service for customers, the community and the country's development.

■ MISSION

Customer satisfaction through quality & innovative products.

Become a market leader in sales through reliable sales people along with the latest technology and online systems.

Quality control with SOP in accordance with SNI and international standards (ISO 9001 - 2015).

Quality of sustainable management (TQM Improvement).

▶ OUR COMMITMENT

We are proud to announce that Perkasa Beton Batam (PBB) has received the certification to ISO 9001:2015 by TUV Rheinland.

ISO 9001 is the standard for ‘quality management’ across our entire business. The certification will support us to maintain the highest levels of service quality that today’s business environment demands. Our clients now have complete assurance that Perkasa Beton Batam (PBB) operates to the highest quality standards, while we will continually strive to maintain and improve these standards that set us apart.

- To Produce 1st Quality Concrete Ready Mix.
- Continual Improvements of our Human Resources to fulfil the Quality Standard.
- Attaining customer and Stakeholder satisfaction at maximum level.

“1st Quality Is Our Commitment”

H **HIGH RESPONSIBLE** **TANGGUNG JAWAB** 

“Our Culture Build Us To Strive For 1st Quality”

▶ INFORMATION TECHNOLOGY INTEGRATION

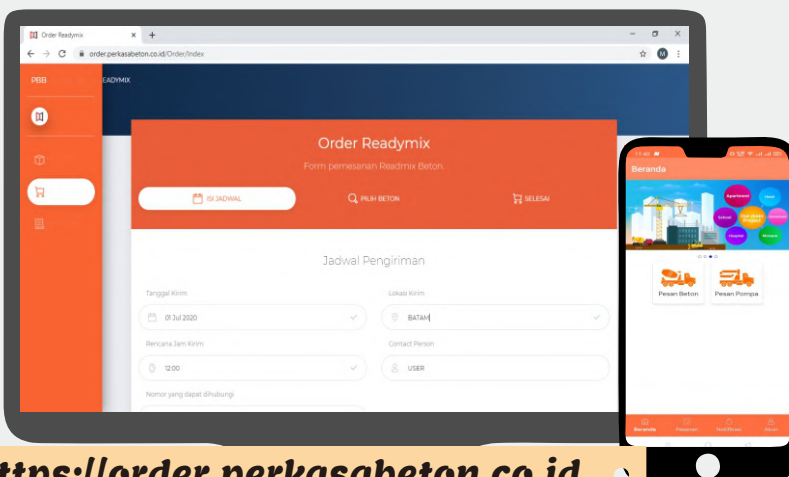

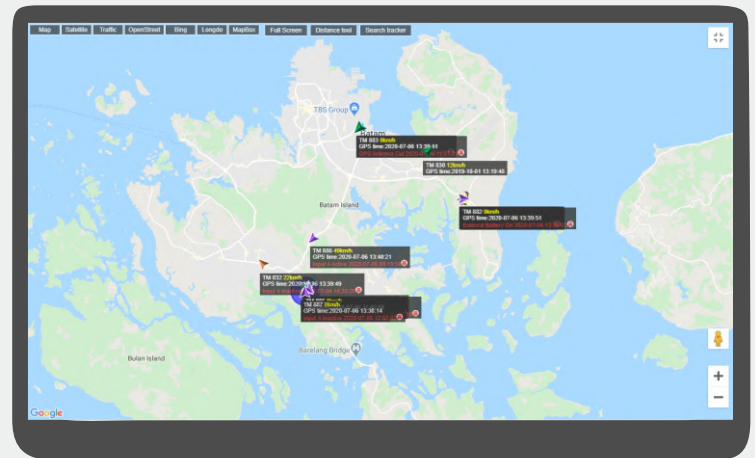

To compete with the current fast changing environment and technology. Since 2018, we have try to integrated new information technology system to our operational procedure. We are proud to introduce our system :

Delivery Management System (DMS) is being built to achieve highly efficient and effective operational time. Being monitoring real time, we strive to delivery our readymix ontime.

Our mixer truck is equipped with Global Positioning System (GPS) system. Real time monitoring our mixer truck to reduce lead time in production and this enhance delivery time commitment.

Our retail and end user ordering platform for readymix. It is being introduced to public. For easier way to order our product without leaving home and increase their trust on our product.
